LANGUAGES

- English (Professional)
- Amharic (Native)

PROFILE

I am a passionate Software Engineering student at Arba Minch University with a strong interest in frontend web development and modern technologies. I have hands-on experience building responsive and user-friendly web applications using JavaScript and React. I enjoy turning ideas into practical digital solutions and continuously improving my technical skills through personal projects and self-learning. I am highly motivated to grow in areas such as Artificial Intelligence and Machine Learning while contributing to innovative and impactful technology solutions.

WORK EXPERIENCE

Little app Ethiopia

Frontend Developer

- Design and develop responsive, user-friendly web applications that align with business requirements and provide seamless user experiences across devices.
- Build and maintain dynamic frontend interfaces using modern web technologies such as HTML, CSS, JavaScript, and React, ensuring clean, maintainable, and efficient code.
